Reasons for allowance

1. The following is an examiner's statement of reasons for allowance:

The present invention is directed to an information recording and reproducing apparatus with a ring buffer. The independent claims identify the uniquely distinct feature "a ring buffer monitor image signal generating part for generating a ring buffer monitor image signal indicative of an image showing a relative positional relation of each of said recording position and said reproducing position in said ring buffer." The closest prior arts Sata (US Pat. No. 5,134,499) and Terasawa (US Pat. No. 5,832,173) either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
